DETAILED ACTION

Allowable Subject Matter

Claims 41-69 are allowed.

The following is an examiner's statement of reasons for allowance: a plasma processing system including a plasma processing reactor coupled to a plasma chamber, wherein the plasma reactor is configured to initially generate a plasma therein, further *configured to lose an ability to generate the plasma*, and configured to receive plasma from the plasma chamber coupled thereto and wherein the *plasma chamber is configured to restore the ability of the reactor to generate plasma*.

Neither of the prior art of the record teaches or suggests coupling a remote plasma source to an inductively coupled plasma reactor which is *configured to deposit a metal layer* on a substrate and wherein the *remote plasma source is further configured to remove metal deposit from the reactor*.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
